

PhD positions in high-energy astrophysics

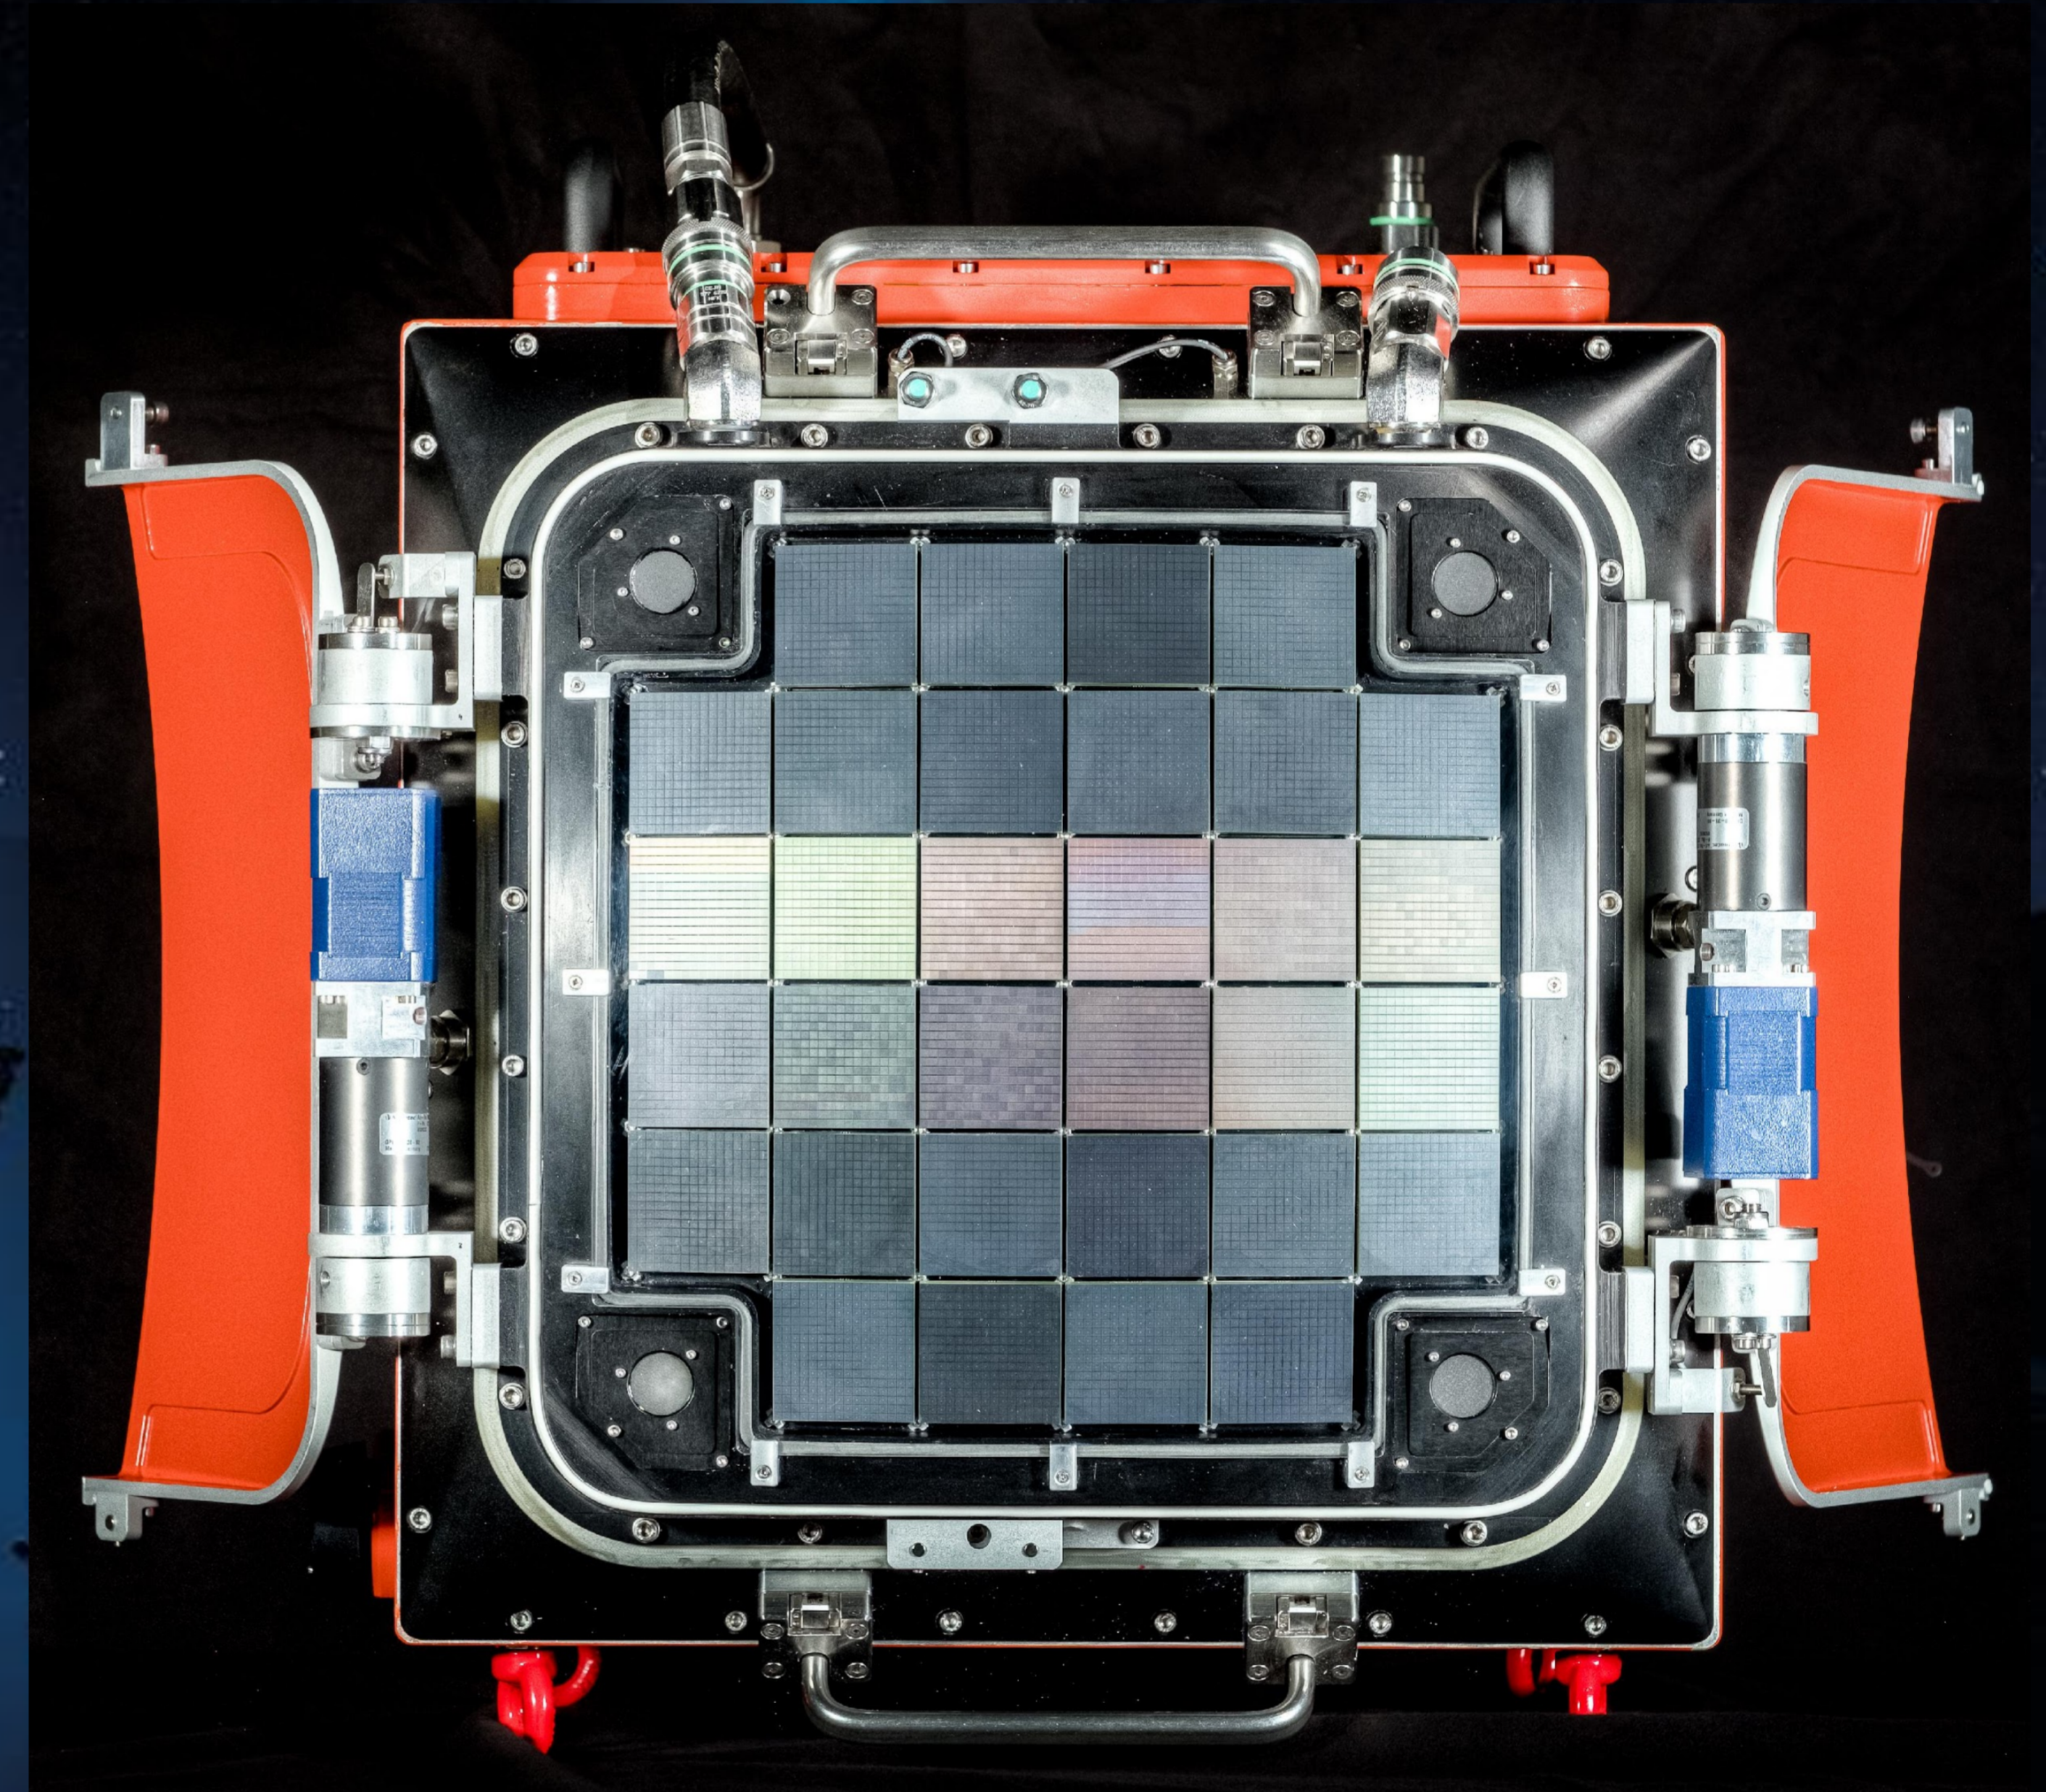

Building observatories to
access the energetic Universe

You work in the stimulating international environment of ECAP, providing you with ideal conditions for pursuing your PhD.

Successful applicants will have access to fully funded positions available in the areas of instrumentation and data analysis in gamma-ray astronomy and gravitational wave detection for CTA and the Einstein Telescope.

The application due date is March 15th, 2025. Possible starting dates are negotiable.
