

PhD positions in advanced X-ray imaging

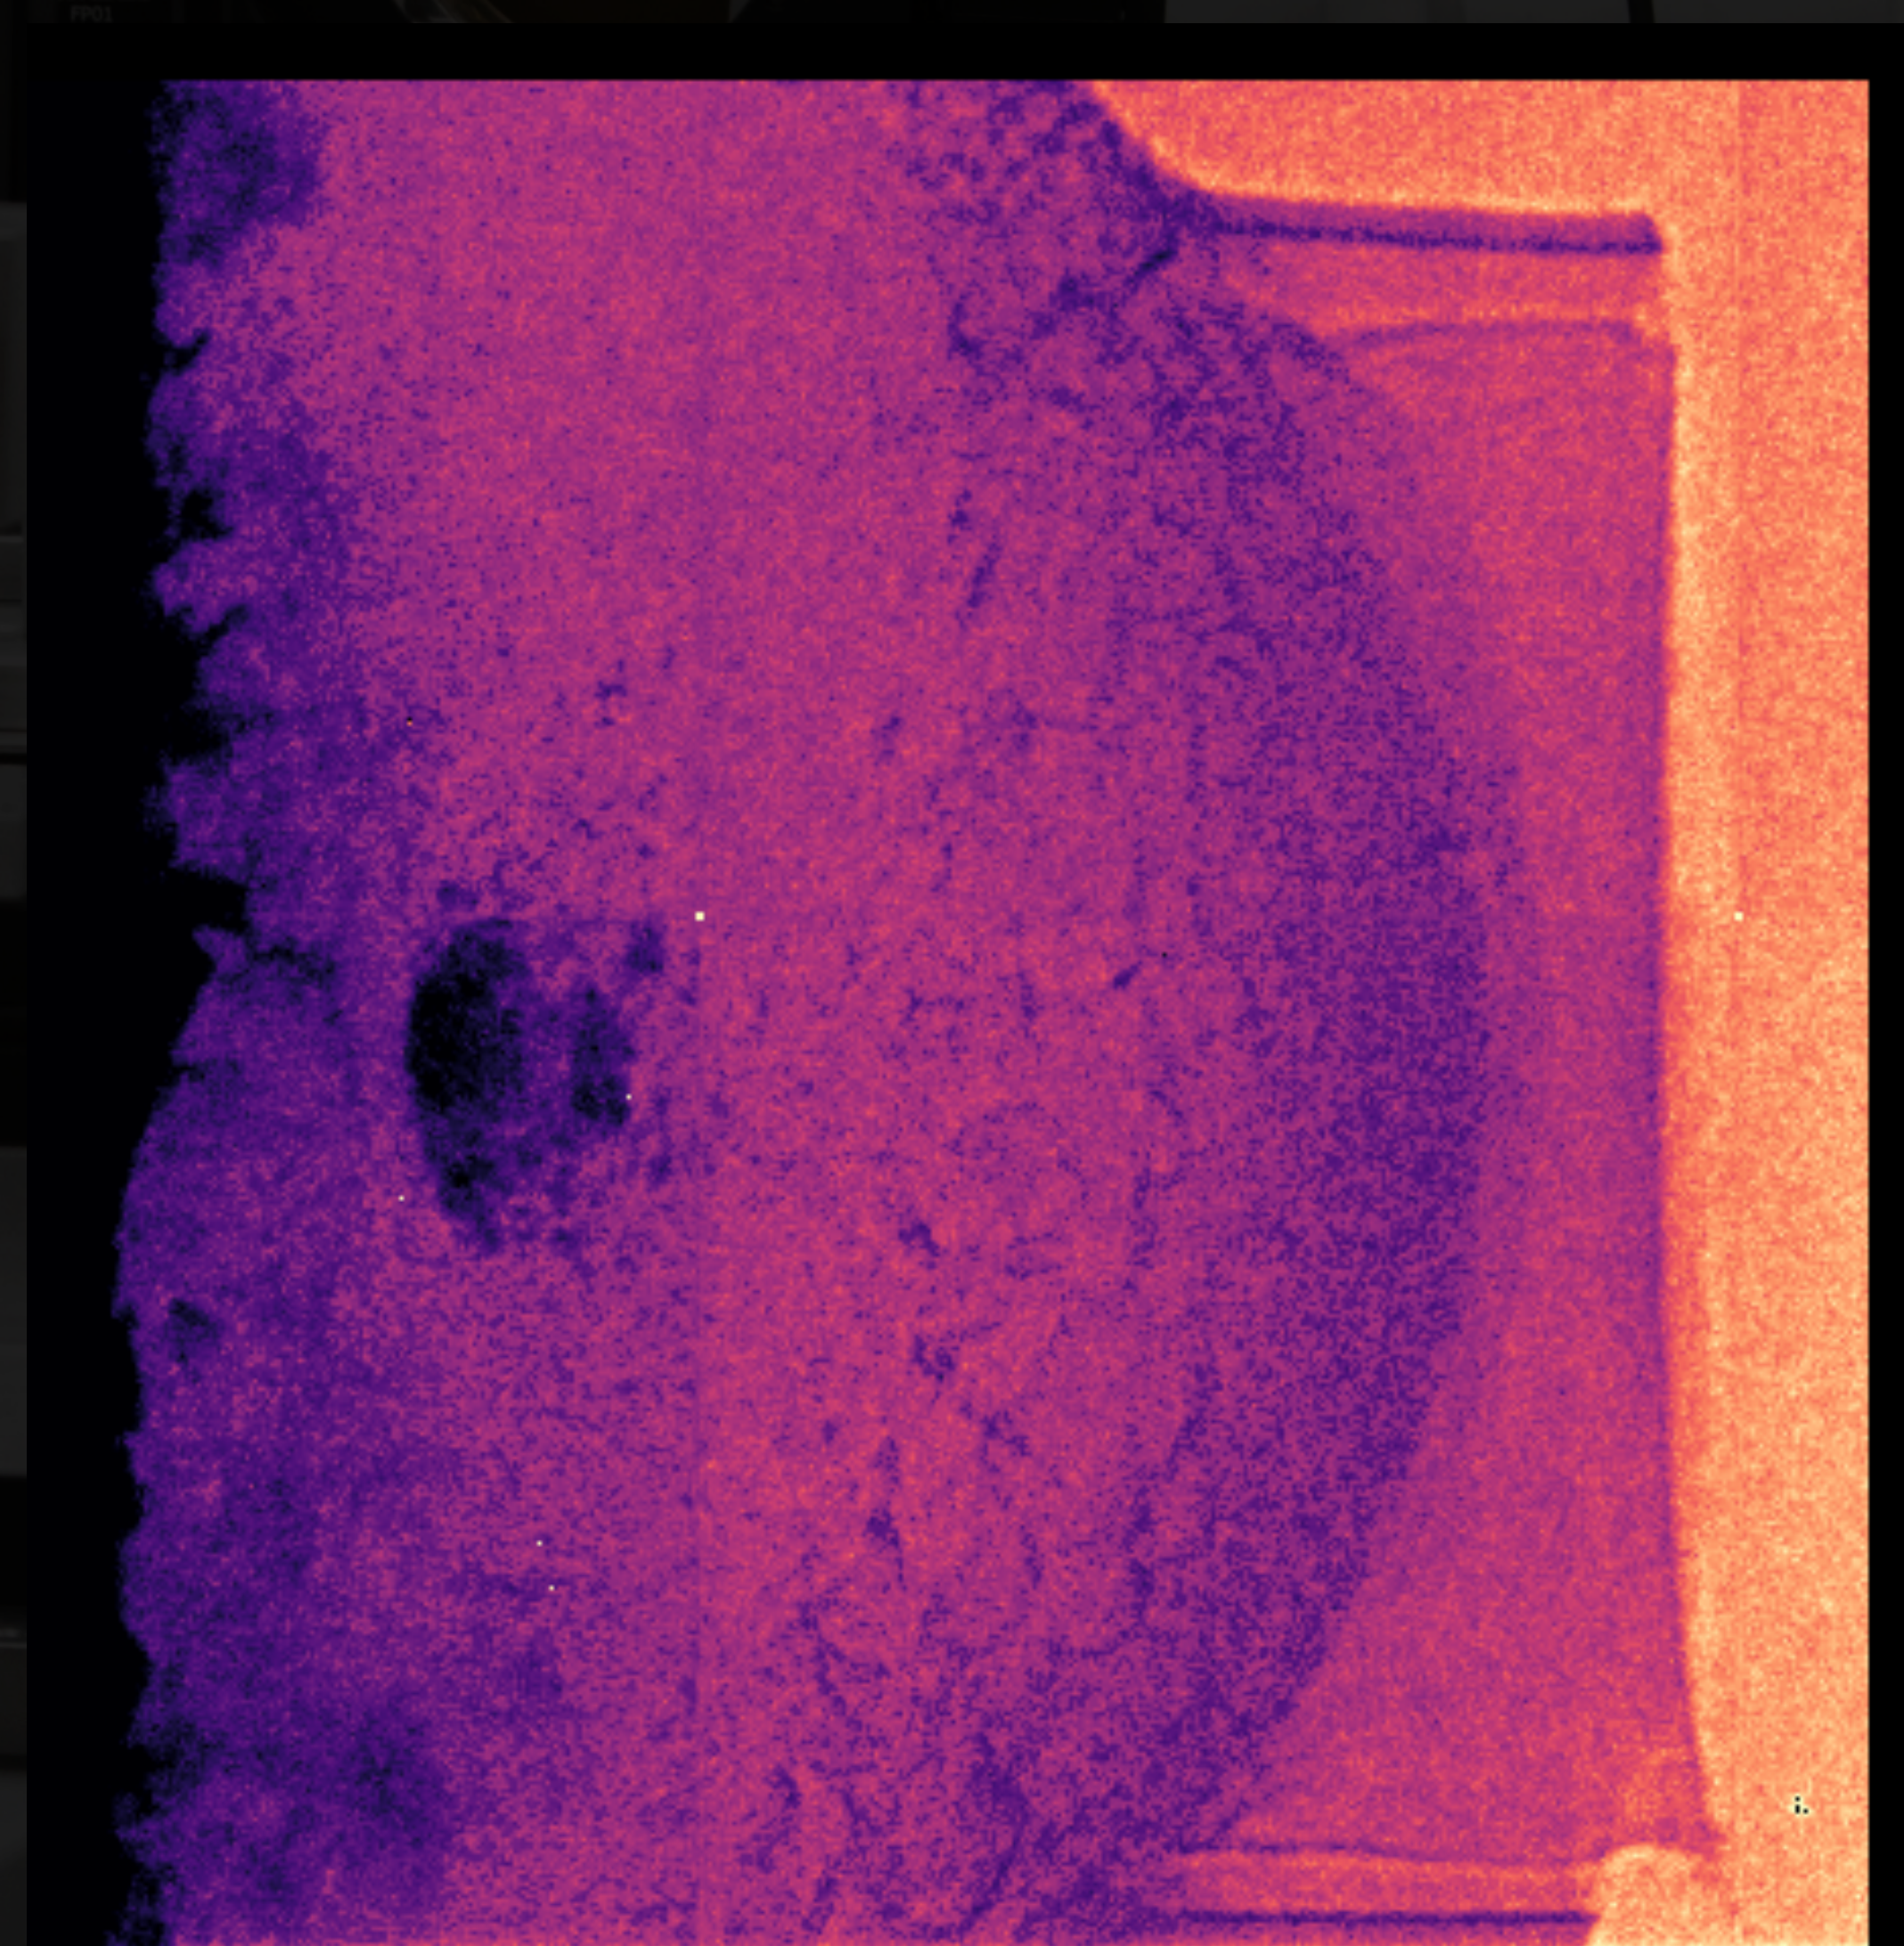

Develop X-ray phase-contrast imaging to study medical samples and astrophysical processes in the lab

You work in the stimulating international environment of ECAP and conduct experiments at research facilities such as the European XFEL, or the LCLS providing you with ideal conditions for pursuing your PhD.

Successful applicants will have access to fully funded positions available in the X-ray imaging group.

The position has an application due date of March 31st, 2025 and is open until filled. Possible starting dates are negotiable.
